Space Technology
For Protecting
Space On Earth
Leaders in Condensed Aerosol Technology.

All FirePro® Fire Extinguishing Aerosol systems use the latest generation of the stable SBK aerosol forming solid compound (it does not contain pyrotechnic materials such as nitro-guanidine or nitro-cellulose). Upon activation the solid compound is transformed into a rapidly expanding, highly efficient and highly effective, fire extinguishing aerosol, based on Potassium salts.

- Efficient
- Cost Effective
- Environment Friendly
- Halon Alternative

The ability to effectively combat fire is not a matter of unnecessary expense in a luxury product. It is a sound investment, that may prove to be of vital importance.

- Autonomous & Automatic. There Is No Need For External Electrical Or Pressure Supply.
- The Coolant Is A Natural Mineral. There Is No Danger Of Blockage Of The Outlet.
- Greater Efficiency & Effectiveness Than Other Systems.
- Does Not Damage Property, Machinery, Electronics.
- Its Built-In Activation System Ensures Operation.
- Activated Electrically, Thermally, Manually.
- Subject To Negligible Maintenance Costs.
- Non-Pressurised Containers.
- Space & Weight Saving.
- Easy Installation.

The Environmentally Friendly Material Used Is The Result Of Many Years Of Research And Development In One Of The World's Leading Institutes Of Technology
environment friendly

Our Products Are:
- Non-toxic
- Non-conductive
- No Oxygen Depletion
- Global Warming Potential = 0
- Ozone Depletion Potential = 0
- Atmospheric Lifetime = Negligible
- CFC Free
- ISO 14001 Certified

Every year fire causes the loss of many lives and damage to assets and property worth billions of dollars.

FirePro®

Conventional agents employ depletion of oxygen and/or cooling to extinguish fire. FirePro® aerosol inhibits the chain chemical reactions present in fire. By removing the flame free radicals it extinguishes fire without depleting oxygen.

The FirePro® Principle
